My Toshiba laptop came preinstalled with Windows 7 Home Premium and as I do all modern laptops a hidden recovery partition it 400 MB in size.

You usually choose for a recovery partition and the restoration image usually has all the same crapware in it with the PC initially they are ausgeliefert.. If you have created a backup of OneDrive install the OneDrive app again wait downloaded to files from OneDrive completely into the OneDrive folder copy it to my folder or move the user folder on the new installation in the OneDrive folder Save your files with OneDrive in the cloud.. Schein on browser extensions or extensions to only those you know you want or are required to display a page Include proper thing Flash Shockwave WMP or QuickTime plug-in a reader Silverlight.. You can clean secure copies of licensed copies of Office on disk iso or run exe Microsoft Download which can be enabled with the product key you originally purchased or checked I use Belarc from Step 2 above.
