I like the soothing colors and cartoon artwork: it reminds me of 80s games like Fantasy Zone. The overall gameplay looks good, but it's hard to be sure. The problem is the controls. For some reason, you have to hold down the left mouse button to move. The fire button is either the right mouse button or the space bar, and the missile launch is the ctrl key. Maybe on the planet Hodsola where they have genticles instead of hands, this control scheme would make sense, but on Earth, we'd rather use our game controller, or at least have the mouse or keyboard guide without extra clicking.
